

This is the main page. There are seven icons with each of them having a different functionality. Let's first look at the UI that is linked to the icon in the top left.

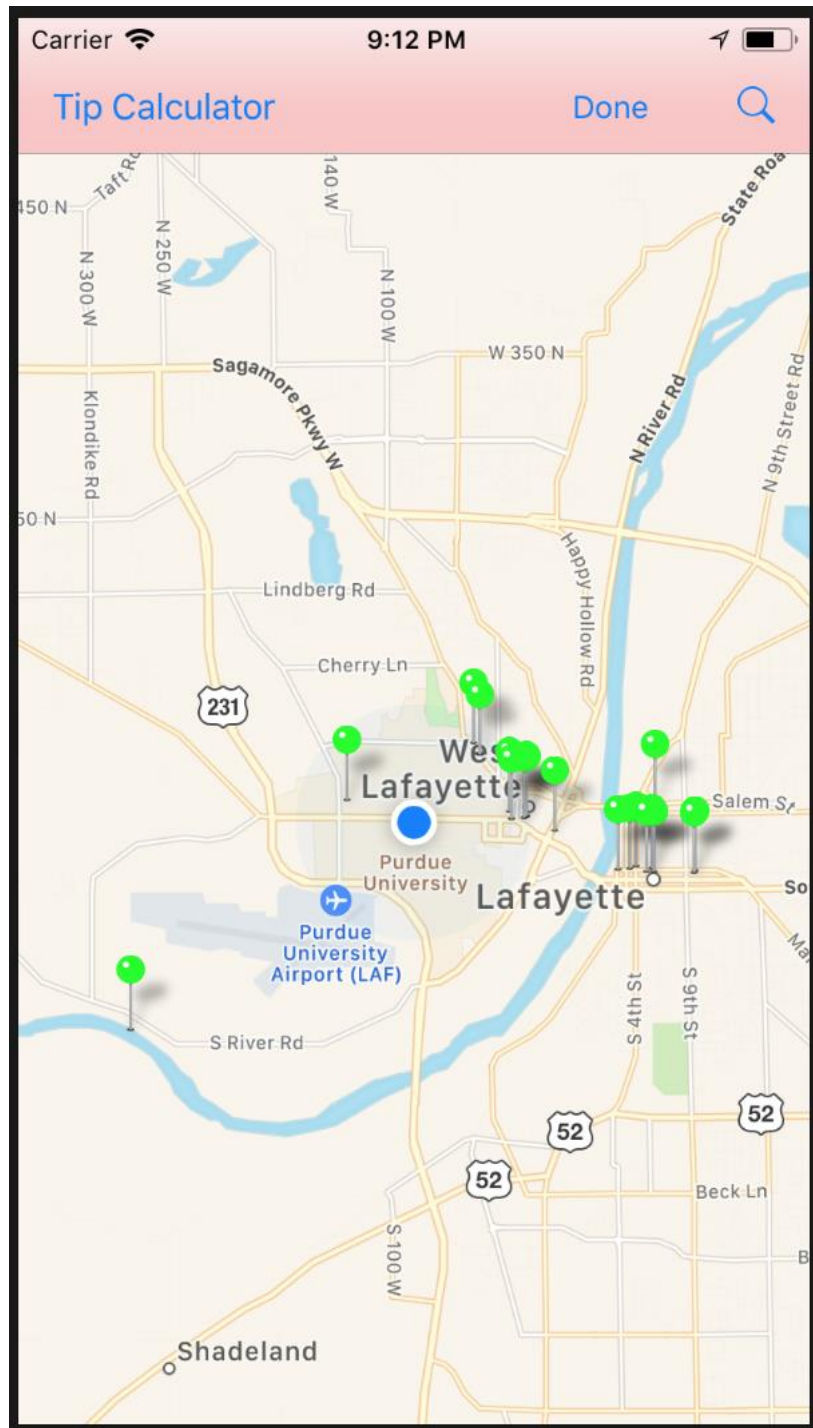

This is the UI that allows users to add friends by scanning each other's QR codes. There is an icon to the top left which allows the user to scan the QR code when clicked on.

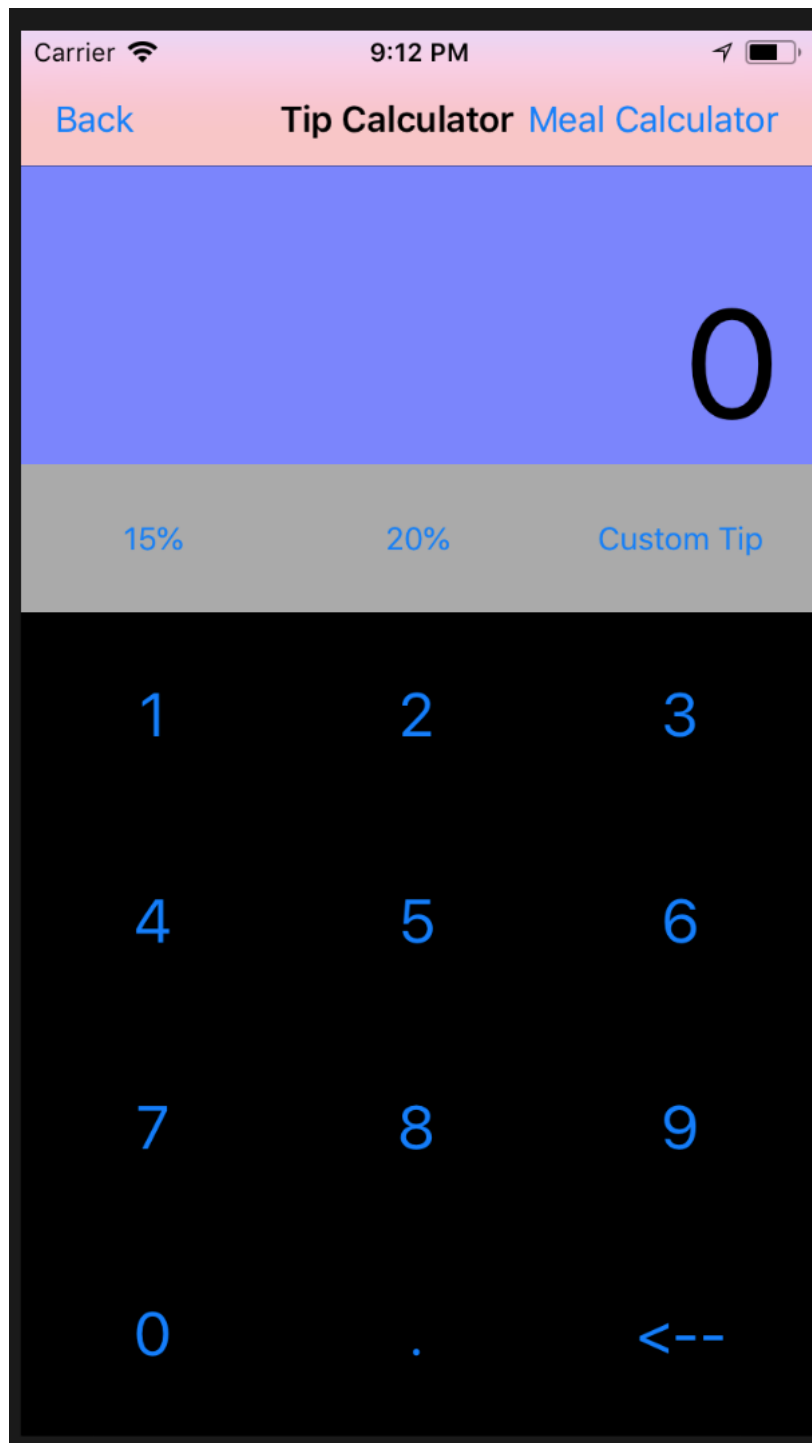

This UI comes up when the icon next to the top left icon is clicked on. This UI displays all the friends in the user's friend list. To the top left is the label map which allows the user to view his or her friends' locations with a switch in the middle that allows the user to turn off his or her location for privacy

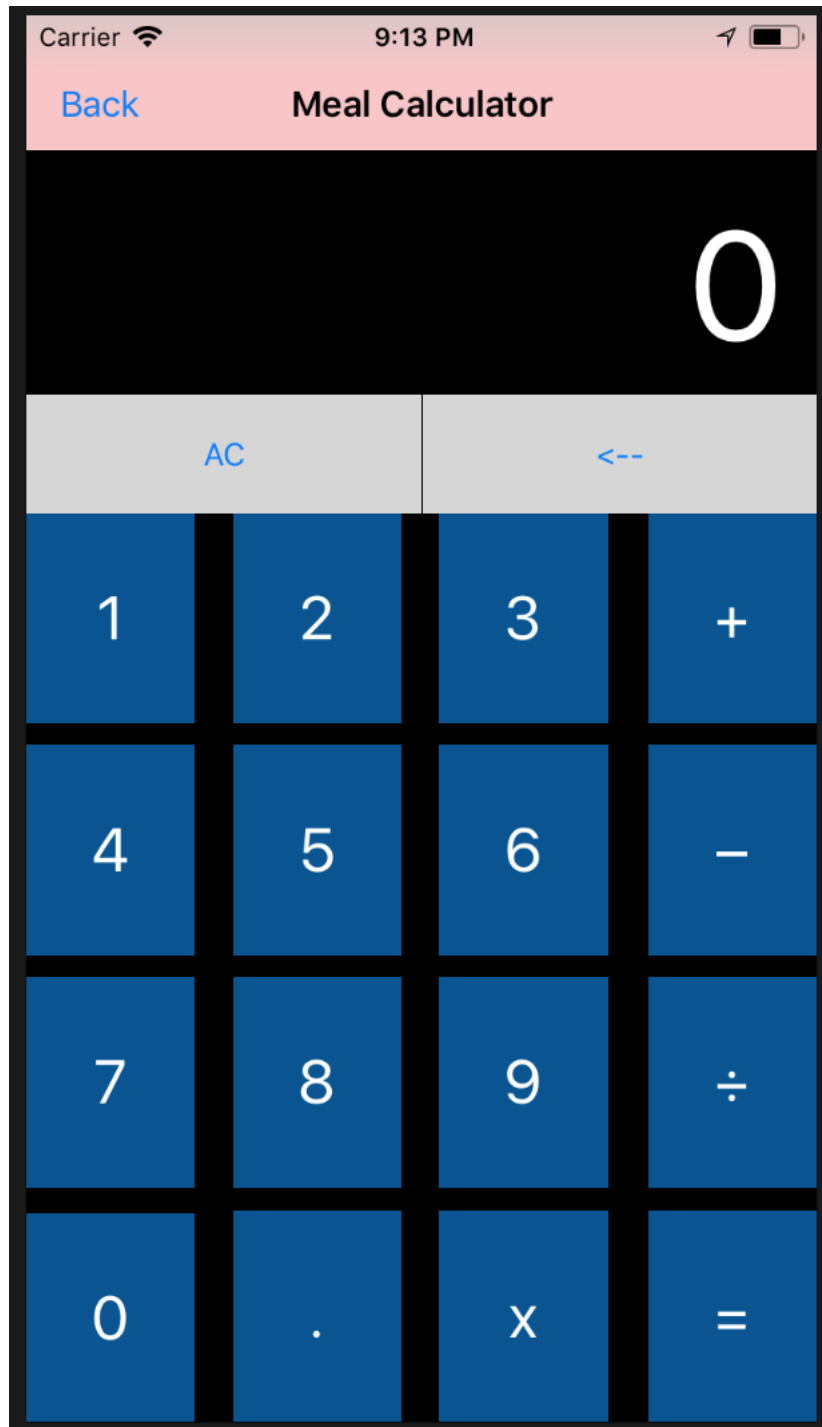

This UI comes up when the icon to the bottom left is clicked on. This UI displays all the restaurants near the user and allows the user to see more information when clicked on.

This UI comes up when the text to the top left on the restaurant page is clicked. The user can calculate the total price of the meal including the tip of whatever percentage the user wants.

This UI comes up when the text to the top right on the tip calculator page is clicked on. The user can calculate the total cost of the meal by using the calculator.

This UI comes up when the icon in the middle of the main page is clicked on. In this page the user can create his or her own party or view parties.

This UI comes up once the user creates the party. Any user can go into a party to chat with people and decide to have meals with them.

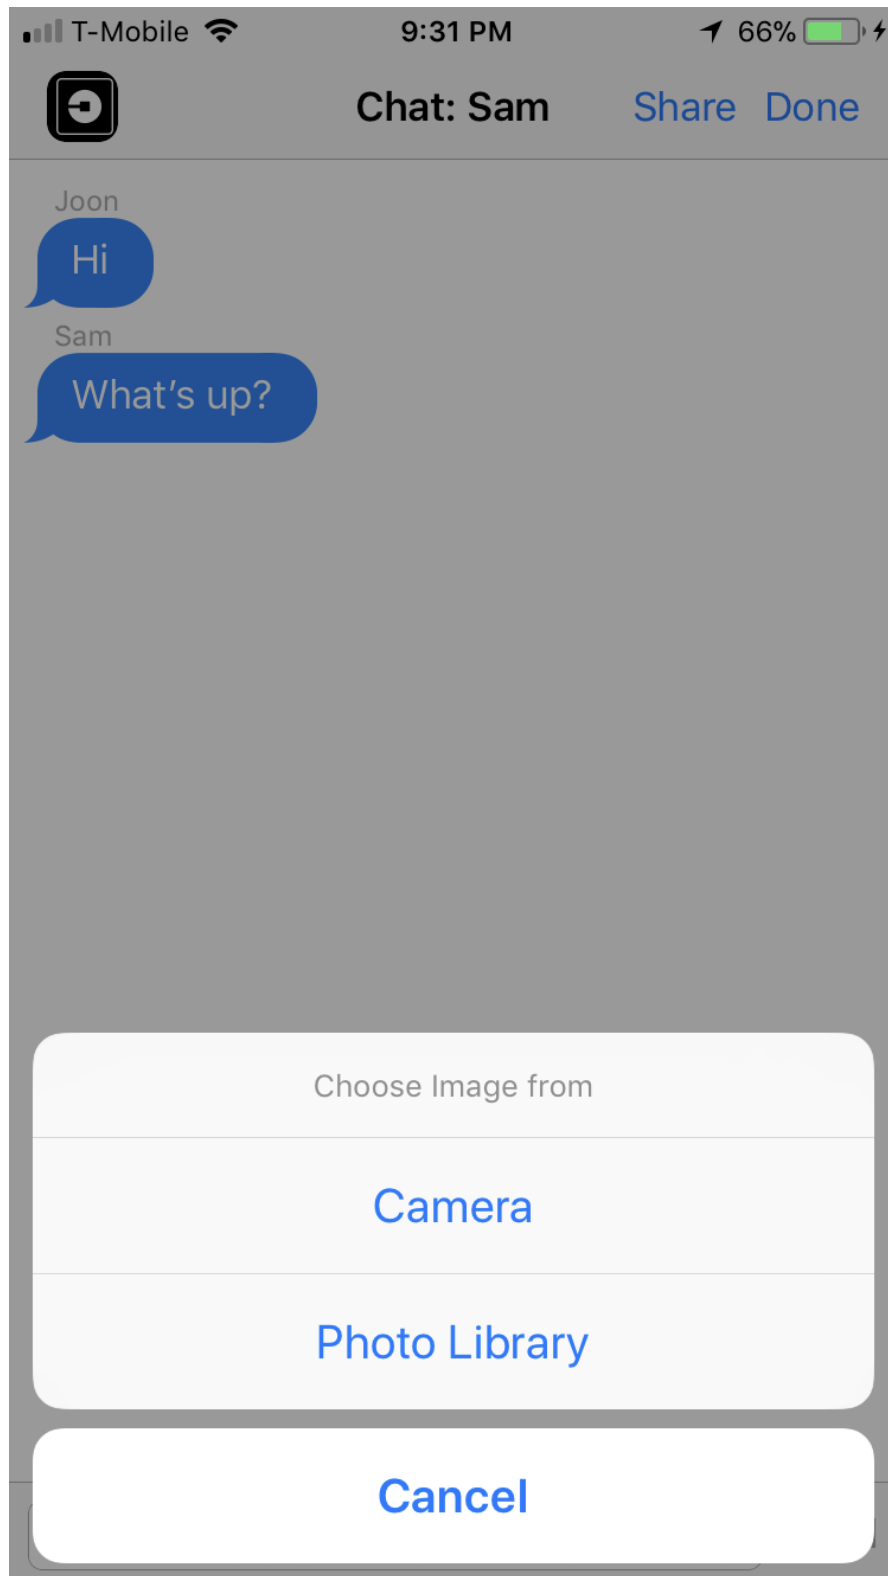

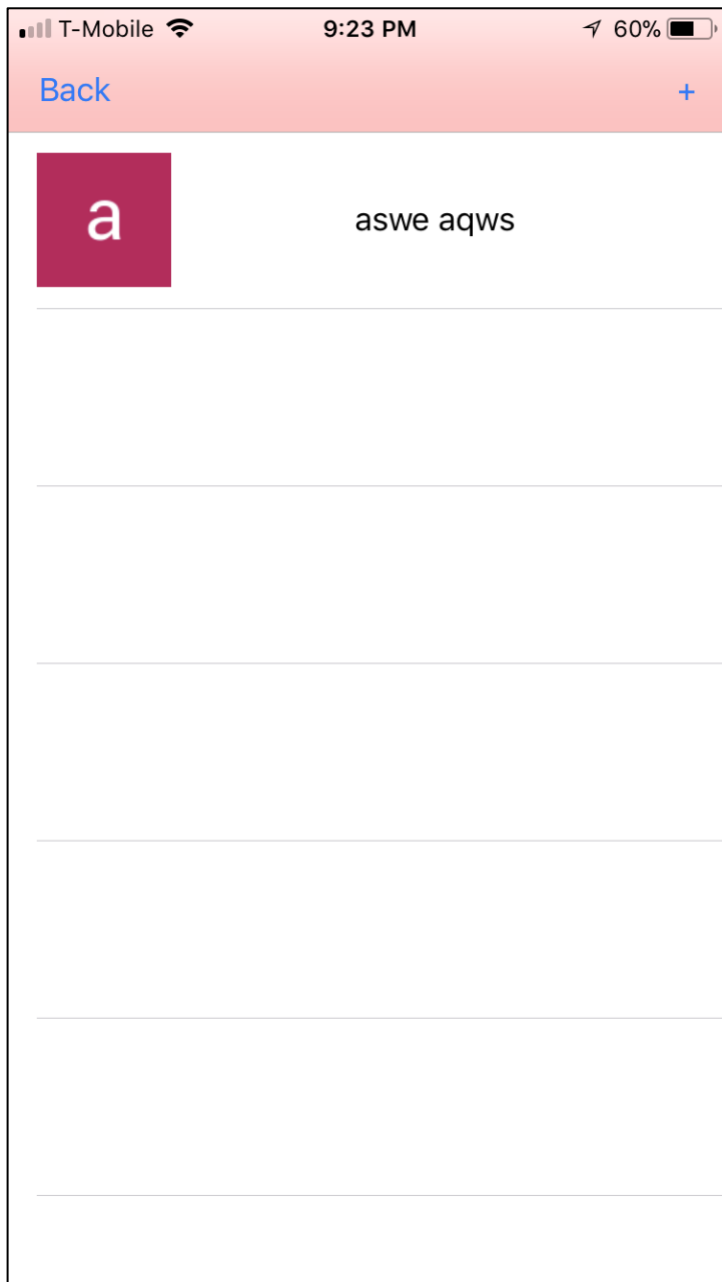

This is the UI that allows multiple people to chat if they join the party. This way users can communicate and plan to have meals together.

Users can click on the icon to the top left to get an Uber. Users can also share photos that have been taken immediately or in their camera rolls through airdrop.

This UI comes up when the icon to the bottom right in the page in the main page is clicked on. On the top right is the chatting feature that allows the user to change the color of the text, text bubble and the background color.

When the user selects the friend he or she wants to chat with this UI comes up allowing the user to chat privately 1 to 1.
